

# ASHBURN

*Cut - Clean - Protect*

## TECHNICAL DATA SHEET

# PREMIXER/PROPORTIONER

## Description

The Ashburn Premixer/Proportioner is designed to premix your Ashburn coolant concentrate with water at the correct proportion. The unit threads into the 2" or 3/4" bung of the concentrate drum and a water hose is connected to it. When the water is turned on, the coolant concentrate is siphoned from the drum and mixed with the water at a predetermined ratio. The ratio is set by the metering tip selected.

## Advantages

- \* SIMPLE AND ACCURATE PREMIXING METHOD
- \* EASILY CHANGEABLE METERING TIPS
- \* NO MOVING PARTS = NO MAINTENANCE

## Availability

**C-10500 ..... Premixer/Proportioner**
